Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeff Cameron on September 30, 2004.

The application has been amended as follows:

In the specification (as amended):

On page 1, line 2, after "1999," inserted ---now U.S. Patent No. 6,760,122 B1 issued July 6, 2004,---.

In the claims (as amended):

In claim 1, line 7, replaced "equal" with ---is approximately the value needed to represent---.

In claim 18, line 8, replaced "equal" with ---is approximately the value needed to represent---.

In claim 25, line 7, replaced "equal" with ---is approximately the value needed to represent---.

In claim 25, line 10, replaced "equalling" with ---approximating---.

In claim 26, line 7, replaced "equal" with ---is approximately the value needed to represent---.

Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Referring to claims 1-26, the prior art searched and of record neither anticipates nor suggests in the claimed combinations, transforming a second set of color values, formed by dithering a first set of color values, into a second color space, such that the average value of the second set of color values is approximately the value needed to represent the first set of color values.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

Kakutani (US 6215561) discloses an error diffusion method or a least mean-error method adopted by the pre-tone number conversion unit 140 (Fig. 7) that converts each piece of original image data in a first color space to a second value relating to an adjacent lattice point, in order to make the mean value of local color in a specific area substantially equal to the original color image data. However, Kakutani does not teach a color transformation process that transforms the converted image data in a first color space into image data in a second color space, such that the average value of the image data in a second color space is approximately the value needed to represent the original image data in the first color space.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott A Rogers whose telephone number is 703-305-4726. The examiner can normally be reached on Monday & Wednesday 6:00am-6:00pm and Tuesday & Thursday 6:00am-2:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kimberly Williams can be reached on 305-4863.
